MESSAGE

It is a matter of personal pride to get an opportunity to serve in island premium engineering department for a period of about three and half decades and serve Andaman Nicobar for such a long spell of time in various places and post which has contributed immensely to public life.

I feel satisfied and filled with sense of personal achievement in serving the department and people with all my personal devotion and sense of dedication for such long time. During whole service life, I have tried to keep the sprit of service as my guide and team spirit as success mantra and I hope, I have faired very well in achieving important goals.

Continued and whole hearted support from my Colleagues, Officers and Staff has been always memorable. It has always been catalytic in accomplishment of many a hard and complicated matter during my service time. I feel very emotional and short of words at this moment to express my gratitude to them, but it will be always be reflected in the works accomplished with their support, which will last for ever.

Separation after such a long association is always disheartening. However past memories and feelings are much stronger than the gaps of physical separation. I hope our physical disassociation will not come into way of our togetherness, sprit and dynamism.

At this stupendous moment I express my sincere thanks to all senior officers of Administration, my colleagues, officers, staff and most importantly our workers for their guidance ,co-operation and whole heartedly support and wish you all a very cherished carrier in future and well being of all family members.

Thanks to all. Thank you so much.

Er. P.K. Singh
